

True Subject Value-Added Analysis

Have you heard about SISRA's Subject Progress Index (SPI)? Using data collected from over 1300 schools and over 200,000 students, our groundbreaking SPI measure allows you to compare your current Y10 and Y11 performance against average student performance in 2018 on a subject-by-subject basis. Each student's performance is compared directly against that of all students with the same KS2 starting point – think Subject Progress 8, but better!
